From prenatal genetic testing and "t;manscaping"; to televideo cybersex and the "meth economy," this innovative work digs deep into contemporary lifestyles and current events to cover key concepts and theories about the body. A combination of twenty one classic readings and original essays, the contributors highlight gender, race, class, ability, and sexuality, paying special attention to bodies that are at risk, bodies that challenge norms, and media representations of the body. CHARITY BEGINS AT HOME... And Melissa Chanley's apartment was much too cramped for two rambunctious, motherless little boys. But they needed more than spacious accommodations and a foster mom. They needed a father figure to look after and love them. In desperation, Melissa turned to the one man who might be able to help—and the last man likely to become a dad...or husband. Busy attorney David Ardell reluctantly agreed to house the young orphans and their temporary caregiver in his sprawling home, though he never expected that the move would make him feel like the head of a family—much less battle a fierce attraction to a spiritual woman like Melissa....

Introduces special forces, discussing the people, equipment, and jobs they do.

An award-winning environmental historian explores American history through wrenching, tragic, and sometimes humorous stories of getting lost The human species has a propensity for getting lost. The American people, inhabiting a mental landscape shaped by their attempts to plant roots and to break free, are no exception. In this engaging book, environmental historian Jon Coleman bypasses the trailblazers so often described in American history to follow instead the strays and drifters who went missing. From Hernando de Soto's failed quest for riches in the American southeast to the recent trend of getting lost as a therapeutic escape from modernity, this book details a unique history of location and movement as well as the confrontations that occur when our physical and mental conceptions of space become disjointed. Whether we get lost in the woods, the plains, or the digital grid, Coleman argues that getting lost allows us to see wilderness anew and connect with generations across five centuries to discover a surprising and edgy American identity.
