Buildings have often been studies whole in space, but never before have they been studied whole in time. How Buildings Learn is a masterful new synthesis that proposes that buildings adapt best when constantly refined and reshaped by their occupants, and that architects can mature from being artists of space to becoming artists of time. From the connected farmhouses of New England to I.M. Pei's Media Lab, from "satisficing" to "form follows funding," from the evolution of bungalows to the invention of Santa Fe Style, from Low Road military surplus buildings to a High Road English classic like Chatsworth—this is a far-ranging survey of unexplored essential territory. More than any other human artifacts, buildings improve with time—if they're allowed to. How Buildings Learn shows how to work with time rather than against it.

In one harrowing day, Viking raiders capture Bree and her brother Devin and take them from their home in Ireland. After the young Viking prince Mikkel sets Devin free on the Irish coast far from home, Bree and Devin embark on separate journeys to courage. Readers will be captivated by the unfolding drama as Bree sails to Norway on the Viking ship and Devin travels the dangerous road home. They both must trust their all-powerful God in the midst of difficult situations.

The popular image of the Vikings is of tall red-headed men, raping and pillaging their way around the coast of Europe, stopping only to ransack monasteries and burn longships. But the violent Vikings of the 8th century became the pious Christians of the 11th century, who gave gold crosses to Christian churches and in whose areas of rule pagan idols were destroyed and churches were built. So how did this radical transformation happen, and why? What difference did it make to the Vikings, and to those around them, and what is their legacy today? This book takes a "global" look at this key period in Viking history, exploring all the major areas of Viking settlement. Written to be an accessible and engaging overview for the general reader.

Raiders from the Sea

From a New York Times best-selling historian and Pulitzer Prize finalist, a sweeping epic of how the Vikings and their descendants have shaped history and America

A leading medical ethnobotanist tells us the story of her quest to develop new ways to fight illness and disease through the healing powers of plants in this uplifting and adventure-filled memoir. Plants are the basis for an array of lifesaving and health-improving medicines we all now take for granted. Ever taken an aspirin? Thank a willow tree for that. What about life-saving medicines for malaria? Some of those are derived from cinchona and wormwood. In today’s world of synthetic pharmaceuticals, scientists and laypeople alike have lost this connection to the natural world. But by ignoring the potential of medicinal plants, we are losing out on the opportunity to discover new life-saving medicines needed in the fight against the greatest medical challenge of this century: the rise of the post-antibiotic era. Antibiotic-resistant microbes plague us all. Each year, 700,000 people die due to these untreatable infections; by 2050, 10 million annual deaths are expected unless we act now. No one understands this better than Dr. Cassandra Quave, whose groundbreaking research as a leading medical ethnobotanist--someone who identifies and studies plants that may be able to treat antimicrobial resistance and other threatening illnesses--is helping to provide clues for the next generation of advanced medicines. In The Plant Hunter, Dr. Quave weaves together science, botany, and memoir to tell us the extraordinary story of her own journey. Traveling by canoe, ATV, mule, airboat, and on foot, she has conducted field research in the flooded forests of the remote Amazon, the murky swamps of southern Florida, the rolling hills of central Italy, isolated mountaintops in Albania and Kosovo, and volcanic isles arising out of the Mediterranean—all in search of natural compounds, long-known to traditional healers, that could help save us all from the looming crisis of untreatable superbugs. And as a person born with multiple congenital defects of her skeletal system, she’s done it all with just one leg. Filled with grit, tragedy, triumph, awe, and scientific discovery, her story illuminates how the path forward for medical discovery may be found in nature’s oldest remedies.

From the author of Guns, Germs and Steel, Jared Diamond’s Collapse: How Societies Choose to Fail or Survive is a visionary study of the mysterious downfall of past civilizations. Now in a revised edition with a new afterword, Jared Diamond’s Collapse uncovers the secret behind why some societies flourish, while others founder - and what this means for our future. What happened to the people who made the forlorn long-abandoned statues of Easter Island? What happened to the architects of the crumbling Maya pyramids? Will we go the same way, our skyscrapers one day standing derelict and overgrown like the temples at Angkor Wat? Bringing together new evidence from a startling range of sources and piecing together the myriad influences, from climate to culture, that make societies self-destruct, Jared Diamond’s Collapse also shows how - unlike our ancestors - we can benefit from our knowledge of the past and learn to be survivors. ‘A grand sweep from a master storyteller of the human race’ - Daily Mail ‘Riveting, superb, terrifying’ - Observer ‘Gripping ... the book fulfils its huge ambition, and Diamond is the only man who could have written it’ - Economist ‘This book shines like all Diamond’s work’ - Sunday Times

The Viking Heart

Packed with battles, blood and thrilling adventure, the third blood-stirring chapter in the story of Raven and his fellow Viking warriors is historical fiction at its very best. We lusted for an even greater prize... It is the one prize that can never be lost or stolen or burnt. And we would find it in Miklagard... Raven and the Wolfpack have suffered. Good men have died and the treasures they fought so hard for have been lost. But to such men as these there is something more valuable than silver. That thing is fame -- for fame is the saga-story that a Viking warrior leaves behind when he dies. Now the sea road leads to Constantinople, which Norsemen call Miklagard, the Great City, for it is there that they might find both riches and glory. But the Great City is far away and the voyage there takes the Fellowship in to unknown waters where they face new enemies. From the wind-whipped marshes of the Carmargue to the crumbling walls and arenas of a decaying Rome, Raven must fight harder for his life than ever before. He must prove himself to others -- and he must watch his back too, for an old enemy is sharpening his treacherous claws. The young warrior with the blood-tainted eye will even challenge the Norns of fate who, it is said, have spun his doom. But the Valkyries are stalking, eager for new heroes to take to Ódin's hall. The clash of sword and axe and spear will ring out in Miklagard and the Fellowship will pay a high price in blood for the fame they seek.

The first volume in Hunter S. Thompson’s bestselling Gonzo Papers offers brilliant commentary and outrageous humor, in his signature style. Originally published in 1979, the first volume of the bestselling “Gonzo Papers” is now back in print. The Great Shark Hunt is Dr. Hunter S. Thompson’s largest and, arguably, most important work, covering Nixon to napa!m, Las Vegas to Watergate, Carter to cocaine. These essays offer brilliant commentary and outrageous humor, in signature Thompson style. Ranging in date from the National Observer days to the era of Rolling Stone, The Great Shark Hunt offers myriad, highly charged entries, including the first Hunter S. Thompson piece to be dubbed “gonzo”--“The Kentucky Derby Is Decadent and Depraved,”

which appeared in Scanlan's Monthly in 1970. From this essay a new journalistic movement sprang which would change the shape of American letters. Thompson's razor-sharp insight and crystal clarity capture the crazy, hypocritical, degenerate, and redeeming aspects of the explosive and colorful '60s and '70s.

One warm rainy summer, Freya Dane, a PhD candidate in archaeology, arrives on the ancient Scottish island of Findnar. Estranged as a child from her recently dead father, himself an archaeologist, Freya yearns to understand more about the man, his work on the island, and why he left her mother so many years ago. It seems Michael Dane uncovered much of Findnar's Viking and Christian past through his search for an elusive tomb, and Freya continues with his work. The discoveries she is destined to make, far greater than her father's, will teach her the true meaning of love and of loss. AD 800, and a wandering comet, an omen of evil, shines down on Findnar. The fears of the locals are justified. In a Viking raid, Signy, a Pictish girl, loses her entire family. Taken in by survivors of the island's Christian community, she falls in love with an injured Viking youth left behind by the raiders and is cast out. Confused and bereft, eventually she becomes a nun, a decision that will unleash tragedy as she is plunged into the heart of a war between three religions. Forced to choose between her ancestors' Animist beliefs, her adopted faith, and the man she loves, Signy will call out to Freya across the centuries. Ancient wrongs must be laid to rest in the present and the mystery at the heart of Findnar's violent past exposed.

In Harry Turtledove's The Gladiator, the Soviet Union won the Cold War. The Russians were a little smarter than they were in our own world, and the United States was a little dumber and a lot less resolute. Now, more than a century later, the world's gone Communist, and capitalism is a bad word. For Gianfranco and his friend Annarita, a couple of teenagers growing up in Milan, life in a heavily regimented, surveillance-rich command economy is just plain dreary. The eventual withering-away of the state doesn't look like it's going to happen anytime soon. Annarita's a hard-working student and a member of the Young Socialists' League. Gianfranco is a lot less motivated--but on the other hand, his father's a Party apparatchik. The biggest excitement in their lives is a wargame shop called The Gladiator, which runs tournaments, and stocks marvelous complex games you can't find anywhere else. Then, abruptly, the shop is shut down. Someone's figured out that The Gladiator's games are teaching counterrevolutionary capitalist principles. The Security Police are searching high and low for the shop's proprietors, who've not only vanished into thin air, but have left behind sets of fingerprints that aren't in the records of any government on earth. Only one staffer is left: Gianfranco and Annarita's friend Eduardo. He's on the run, and he comes to them in secret with an astonishing story: he's a time trader from our own timeline, accidentally left behind when the store was evacuated. The only way Eduardo can get home to his own timeline is if Gianfranco and Annarita can help him reach one of the other time trader sites in this world--and the Security Police will be on their tails all the way there.
