Notes and Queries

An Edition, Translation and Study of John of Glastonbury's "Cronica Sive Antiquitates Glastoniensis Ecclesie"

John of Glastonbury's chronicle represents an attempt to summarise the lore and learning about Glastonbury Abbey and its past available in the fourteenth century, a body of knowledge which changed very little before the Reformation. The author drew on a large number of sources and edited these skilfully to form his narrative, while preserving the earlier text almost intact. The result is the fullest medieval account of the abbey and its legends, and this edition will be very welcome, drawing as it does on the latest research. A translation is included, which makes the important text available in English for the first time, and the whole volume is designed as a companion to John Scott's edition and translation of William of Malmesbury's twelfth century account of the abbey's history.

The Gentleman's Magazine, and Historical Chronicle, for the Year ...

The highly esteemed Catholic convert, writer and apologist Ronald Knox, a master of the English language, was well regarded for his gifts both of writing and preaching. This volume combines both skills as it is a collection of his homilies on all the important themes of the spiritual and moral life, and on his favorite saints, men and women of history who were "inflamed with the love of Christ". In his always descriptive, profound and witty style, Knox covers a very wide variety of pastoral themes for Christian living and growth in spiritual perfection. Themes such as "The Fatherhood of God", "The Sermon on the Mount", "The Gifts of God", "The Triumph of Suffering", "The Divine Sacrifice", and dozens more. In his "occasional" sermons on saints and Christian heroes, he shows how these heroes of history struggled with many of the same spiritual battles that modern believers encounter daily, and overcame them with faith, courage, character and virtue. These are the shining witnesses of the truth and charity we all seek to emulate.

Floods, Public Policy, and the Sacramento Valley

The Crego Chronicles

"Of late historians have become increasingly interested in the vast re-ordering of the environment involved in the creation of America. Nowhere was this more true than in the Sacramento Valley where re-ordering edged into folly. Battling the Inland Sea is a powerful evocation of the losses and gains involved in battling the mighty Sacramento River. But more than this, it is an exploration of the national will as it sought to rearrange nature herself with such mixed results. Here is history dealing with the most elemental forces of land, water and engineering as they are shaped by public policy. Here is the profound drama of value and symbol which occurs when Americans come into conflict with forces over which they can exercise, as Robert Kelley shows, only the most transitory and pyrrhic victories."—Kevin Starr, author of the Americans and the California Dream "Robert Kelley's research into the origins of California's first great flood control system has already helped to inform the shaping of the state's water laws. Now he opens up the benefits of that work for the average reader in a wonderfully clear and engaging story that manages, among other things, to show that water development in the United States hasn't been just a matter of engineering but a cultural and intellectual achievement as well."—William Kahrl, author of Water and Power "A vividly written narrative of one of the major transformations of the physical world we inhabit. Robert Kelley draws upon his rich store of learning and insight to set the struggles over the Sacramento Valley into a broad context. His book contains important lessons for those who would understand the American economy, environment, politics, or culture."—Daniel W. Howe, author of The Political Culture of the American Whigs

If you could make one wish that was guaranteed to come true—what would you wish for? Rules for Wishing: Never let an outsider find out about wishing. (Zip your lips and throw away the key.) Wishes that would impact the world are off limits (i.e. no bringing back the dinosaurs). Do no harm. (Murder = no bueno.) No time travel. (What's done is done, pal.) No bringing back the dead. (Come on. You've seen what happens in THE WALKING DEAD.) NEVER BREAK THE RULES. (Seriously. We mean it. See Rule #7.) There are always consequences. Madison is a small town in the Mojave desert on the road between nothing and nowhere. It's an unremarkable speck on the map, which is perfect for protecting the town's secret. Because in Madison, everyone can make one wish on their eighteenth birthday-and that wish always comes true. Most of Eldon's classmates have had their wishes picked out for months, even years. Not Eldon. He's seen how wishing has hurt the people around him. His parents' marriage is strained, his sister is a virtual ghost in their house, his ex-girlfriend is dating his ex-friend...where does he even begin? One thing is for sure: Eldon has only twenty-five days to figure it out—and the rest of his life to live with the consequences.

Additions are Revised in this Eighth Impression, and Freed from Many Errors and Mistakes of the Former Editions

Serial set (no.5800-6599)

"This is the story of the railways which served numerous stone quarry companies around the country. Over many years these companies developed into one of the world's largest international corporations, Hanson Aggregates." "The small firms that merged were stone extractive companies that had produced road setts, kerb stones and tarmacadam for road surfacing; railway track ballast and limestone were used in several industries, especially in iron and steel production. Many of these constituent quarries had their own rail systems, often utilising rope-worked inclines to gain access to mountain tops. A large number of locomotives and even horses hauled a variety of wagons over different gauges, and even today several small quarries dispatch some of the heaviest freight trains, hauled by the most powerful diesel locomotives." "Ian Peaty has collected archive and current material to form a complete history of the Hanson Aggregate Group. This researched history is illustrated by numerous maps, a wide range of photographs, and the author's own watercolour paintings. Moving Mountains by Rail provides a unique record for rail enthusiasts, modellers, and those interested in the aggregate industry and industrial history alike."--BOOK JACKET.

Chronicle of the Horse

An Annual Biographical Dictionary

For almost twenty years, D Acres of New Hampshire has challenged and expanded the common definition of a farm. As an educational centre that researches, applies, and teaches skills of sustainable living and small-scale organic farming, D Acres serves more than just a single function to its community. By turns it is a hostel for travellers to northern New England, a training centre for everything from metal- and woodwork to cob building and seasonal cooking, a gathering place for music, poetry, joke-telling, and potluck meals, and much, much more. In Community-Scale Homesteading, author and D Acres founder Josh Trought describes not only the history of the project, but its evolving principles and practices, all rooted in the land, its inhabitants, and the joy inherent in collective empowerment. From working with oxen to working with a board of directors, no other book contains such a wealth of innovative ideas and ways to make your farm or homestead not only more sustainable, but more inclusive of, and beneficial to, the larger community.

The Collected Letters of A.W.N. Pugin: 1830-1842

Pastoral Sermons and Occasional Sermons

On bookshelves around the world, surrounded by ordinary books bound in paper and leather, rest other volumes of a distinctly strange and grisly sort: those bound in human skin. Would you know one if you held it in your hand? In Dark Archives, Megan Rosenbloom seeks out the historic and scientific truths behind anthropodermic bibliopegy|the practice of binding books in this most intimate covering. Dozens of such books live on in the world's most famous libraries and museums. Dark Archives exhumes their origins and brings to life the doctors, murderers, and indigents whose lives are sewn together in this disquieting collection. Along the way, Rosenbloom tells the story of how her team of scientists, curators, and librarians test rumored anthropodermic books, untangling the myths around their creation and reckoning with the ethics of their custodianship. A librarian and journalist, Rosenbloom is a member of The Order of the Good Death and a cofounder of their Death Salon, a community that encourages conversations, scholarship, and art about mortality and mourning. In Dark Archives|captivating and macabre in all the right ways|she has crafted a narrative that is equal parts detective work, academic intrigue, history, and medical curiosity: a book as rare and thrilling as its subject.

The Community-Scale Permaculture Farm

The D Acres Model for Creating and Managing an Ecologically Designed Educational Center

As the number of adjunct faculty teaching online courses remotely for their institutions continues to increase, so do the unique challenges they face, including issues of distance and isolation as well as problems pertaining to motivation, time, and compensation. Not only are these higher education faculty geographically isolated from each other and their colleagues at flagship campuses, but they also lack adequate institutional support and resources necessary to perform their roles. As institutions continue to rely heavily on this group of under-supported and undertrained instructors who teach the majority of online courses offered across the country, institutions need models and strategies to tap the expertise and perspectives of this group not only to improve teaching and learning in online programs but also to retain this critical talent pool. More consideration is needed to create institutional affinity and organizational commitment, build community, and create opportunities for remote adjunct faculty to be included as an integral component to their academic departments. The Handbook of Research on Inclusive Development for Remote Adjunct Faculty in Higher Education is a comprehensive reference work that presents research, theoretical frameworks, instructor perspectives, and program models that highlight effective strategies, innovative approaches, and unique considerations for creating professional development opportunities for remote adjunct faculty teaching online. This book provides concrete practices that foster inclusivity among contingent faculty teaching online as well as tangible practices that have been successfully implemented from faculty developers and academic leaders at institutions who have a large population of, and heavy reliance on, remote adjunct instructors. While addressing topics that include faculty engagement, mentoring programs, and instructor resources, this book intends to support remote instructors in the post-pandemic world. It is also beneficial for faculty development professionals; academic administrative leaders; higher education stakeholders; and higher education faculty, researchers, and students.

Battling the Inland Sea

The Lost Chronicles Series

The importance of A. W. N. Pugin (1812-52) in the history of the Gothic Revival, in the development of ecclesiology, in the origins of the Arts and Crafts movement, and in architectural theory is incontestable. A leading British architect who was also a designer of furniture, silver,textiles, stained glass, and jewellery, he is one of the most significant figures of the mid-nineteenth century and one of the greatest designers. His correspondence is important because it provides more insight into the man and more information about his work than any other source. It cuts a cross-section through early Victorian society: his correspondents range from earls and bishops to painters and tradesmen. The letters illuminate majorpublic events like the Oxford Movement, the (Roman) Catholic revival, and the Great Exhibition of 1851. They are vigorous, direct, often witty and provide an invaluable source for architectural and religio-historical research. Dr Belcher's very thorough research generally transforms what has oftenbeen a blank area, drawing together many sources. By 1842, when this volume ends, Pugin is established in his career. He has written books, designed buildings, found his faith, and made himself known.
