Computer Networking for LANS to WANS: Hardware, Software ...

LANS and WANS A network can be anything from two computers connected together, to millions of computers connected on the internet. There are many different types of networks such as LAN, WAN, VPN,...

LANs and WANs - Network hardware - GCSE Computer Science ...

A network device called a router connects LANs to a WAN. In IP networking, the router maintains both a LAN address and a WAN address. A WAN differs from a LAN in several important ways. Most WANs (like the internet) aren't owned by a single organization.

LANs, WANs, and Other Area Networks Explained

The simplest type of LAN network is to connect computers and a printer in someone's home or office. In general, LAN will be used as one type of transmission medium. It is a network which consists of less than 5000 interconnected devices across several buildings. Characteristics of LAN. Here are important characteristics of a LAN network:

Types of Computer Networks: LAN, MAN, WAN, VPN

LANS and WANS There are two main types of network: Local Area Network (LAN) Wide Area Network (WAN) LAN. A LAN covers a small area such as one site or building, eg a school or a college.

LANs and WANs - Network types and topologies - GCSE ICT ...

An Enterprise Ethernet LAN can span in entire building, campus or even a large geographical area. Unlike the SOHO network which usually connects a small number of computers, an Enterprise LAN network can connect a large number of computers. Basically, an Enterprise Ethernet LAN is the extended version of SOHO LAN.

Basic Concepts of Ethernet LAN Explained
