Business, on the other hand, is an economic activity. There is a need for
objectively analyzing structure scope, efficiency and growth of business
Economic analysis is done to provide objectivity. However, indiscriminate

application of economics to business analysis can, sometimes, create confusing paradoxes. These are referred to as Fallacies.

Economic Fallacies Economic Analysis and Business Decision

Economic Factors in Business As previously mentioned, economic factors are included in one of the bread-and-butter techniques of all business analysis — PEST analysis. This is because economic factors play a large part in deciding how a company makes its decisions (especially financial ones).

ECON 210 Economic Analysis for Business Decisions (3 Credits) Students will acquire analytical tools needed in evaluating economic decisions of market firms with a focus on market formation, industrial performance, and strategic communication.

ECON 210 Economic Analysis for Business Decisions ...

Managerial economics is concerned with the application of economic theory and methods of decision sciences to analyse decision-making problems faced by business firms. The first and most important problem faced by a

business firm is the choice of a product to be produced or service to be provided.

Business Decision-Making Problems (With Diagram)

An understanding of key economic concepts is essential for those who manage business enterprise. This course analyses the real-life problems facing actual businesses, and evaluates the effectiveness and limitations of different management attempts to solve them. Business Analysis and Decision Making Aims This course aims to:

Business Analysis and Decision Making

Managerial Economics is of great help in price analysis, production analysis, capital budgeting, risk analysis and determination of demand. Managerial economics uses both Economic theory as well as Econometrics for rational managerial decision making. Econometrics is defined as use of statistical tools for assessing economic theories by empirically measuring relationship between economic variables.
