### In Asia

Asia is home to the largest country in the world based on population, China, whose population is estimated to be about 1.387 billion people, which represents 31.35% of Asia's total population. Timor-Leste, Bhutan, Maldives, Brunei, and Macau make up the bottom five countries with the lowest population (the sovereignty of Macau is yet to be established).

### How Many Countries Are There in Asia? - WorldAtlas

There are 48 countries in Asia today, according to the United Nations. The full list is shown in the table below, with current population and subregion (based on the United Nations official statistics). Not included in this total of "countries" and listed separately are:

### How many countries in Asia? - Worldometer

Asia, the world's largest and most diverse continent. It occupies the eastern four-fifths of the giant Eurasian landmass. Asia is more a geographic term than a homogeneous continent, and the use of the term to describe such a vast area always carries the potential of obscuring the enormous diversity among the regions it encompasses.
