5 years experience with LoRa in agriculture - Reinier van der Lee (Vinduino)#134 15$ LoRa Gateway with ESP8266 and a RFM95 (Tutorial) Openwrt Driven Lora Gateways Feature

Dragino's LoRa Gateways run OpenWrt on an Atheros AR9331 — and Arduino on an ATMega328P — and bridge LoRA wireless with IP using WiFi, Ethernet, or 3G/4G. Shenzhen based Dragino Technology has launched a weatherproof Outdoor OLG01 LoRa Gateway to go along with its two indoor LG01-P and LG01-S LoRa Gateway models for LoRa wireless IoT applications.

OpenWrt-driven LoRa gateways feature indoor and outdoor models

OpenWrt-driven LoRa gateways feature indoor and outdoor models From hackerboards.com 4 years ago in News Dragino's LoRa Gateways run OpenWrt on an Atheros AR9331 — and Arduino on an ATMega328P — and bridge LoRA wireless with IP using WiFi, Ethernet, or 3G/4G.

OpenWrt-driven LoRa gateways feature indoor and outdoor ...
Short bio: Software Engineer, interdisciplinary researcher, and an advocate of fair competition ()

OpenWrt-driven LoRa gateways feature indoor and outdoor ...
Dragino's LoRa Gateways run OpenWrt on an Atheros AR9331 and Arduino on an ATMega328P and bridge LoRA wireless with IP using WiFi, Ethernet, or 3G/4G.

Linux Today - OpenWrt-driven LoRa gateways feature indoor ...
Openwrt allows you to dynamically change the structure of flash IC when the system boots. This is done for the convenience of the main subsystems, file-size requirements, technical limitations of working with NOR flash drives (no wear-leveling and inability to work as with a conventional block device).

Lorawan gateway GW-01. Developers guide. OpenWrt. - M2M IoT
OpenWrt-driven LoRa gateways feature indoor and outdoor models By Rianne Schestowitz Created 14/02/2017 - 8:59pm Submitted by Rianne Schestowitz on Tuesday 14th of February 2017 08:59:48 PM Filed under Linux [1] Dragino?s LoRa Gateways run OpenWrt on an Atheros AR9331 ? and Arduino on an ATMega328P ? and bridge LoRA wireless with IP using WiFi ...

OpenWrt-driven LoRa gateways feature indoor and outdoor models
Run lora_gateway and packet_forwarder on OpenWrt. http://www.semtech.com/wireless-rf/lora.html - mirakonta/OpenWrt-lora

GitHub - mirakonta/OpenWrt-lora: Run lora_gateway and ...
Built-in LoRa ® Server (up to 128 LoRa ® nodes license included, higher tiers require a fee) OpenVPN; Software and UI sit on top of OpenWRT; LoRaWAN ® 1.0.2; LoRa ® Frame filtering (node whitelisting) MQTT v3.1 Bridging with TLS encryption; Buffering of LoRa ® frames in case of NS outage (no data loss) Packaging Details. Product Dimensions: 220mm x 220mm x 104mm

Outdoor LoRaWAN Gateway WisGate Edge Max RAK7249, SX1301 OpenWRT, 8 channels LoRa, 4G, WIFI, GPS, POE. The WisGate Edge Max, RAK Wireless RAK7249 outdoor Gateway is an ideal gateway for Industrial IoT and commercial deployment. The hardware mainboard completely integrates the WiFi, 4G, GPS and POE main supply.

Outdoor LoRaWAN Gateway RAK7249 SX1301 OpenWRT 16 channel ...
The LG01-P is an open source single channel LoRa Gateway. It lets you bridge LoRa wireless network to an IP network via WiFi, Ethernet, Or 3G/4G cellular via optional LTE module. The LoRa wireless allows users to send data and reach extremely long ranges at low data-rates.It provides ultra-long range spread spectrum communication and high interference immunity.

LG01 -P LoRa OpenWrt IoT Gateway from DRAGINO TECH on Tindie
GW-01 is low cost open source Lorawan gateway. The device consists of two interconnected boards. Top of them implements LoRa PHY using SX1301 which is digital baseband chip for outdoor LoRaWAN macro gateways. Bottom one is well known orange pi zero development board with light modification – 8MB onboard flash IC instead of original 2MB.

Lorawan gateway GW-01 getting started. - M2M IoT
GW-01 gateway consists of two boards: OrangePi Zero H2+ 256Mb development board and SX1301 based board that implements LoRa physical interface. All together is 8 channel LoRaWAN gateway (concentrator). GW-01 goes with pre-flashed OpenWrt image in onboard SPI-NOR flash IC.

Lorawan gateway GW-01 - Daizy
A wide feature-list of operator systems for effective IoT network deployments; monitoring, logs, alerts, and powerful tools such as remote gateway management and multiple application outputs provide data regulation and valuable status information. Plus, filtering and search tools to rapidly analyse the network and find anomalies.

Lora Gateways 10,0,0,0 - LORIOT
All together is 8 channel LoRaWAN gateway (concentrator). GW-01 goes with pre-flashed OpenWrt image in onboard SPI-NOR flash IC. Onboard 2 MB flash IC replaced with 8 MB because OpenWrt image fits in that volume. Software Official LoRaWAN software (lora-gateway and packet-forwarder) implements functionality of LoRaWAN gateway.

Lorawan gateway GW-01 - Marketplace – The Things Network
The LG01 is an open source single channel LoRa Gateway. It lets you bridge LoRa wireless network to an IP network base on WiFi, Ethernet, 3G or 4G cellular. LG01 runs on open source embedded Linux system; it has USB host port and has full Ethernet and 802.11 b/g/n WiFi capabilities.

Document Version: 1.4 Firmware Version: IoT Mesh v4.3
The LG01 is an open source single channel LoRa Gateway. It lets you bridge LoRa wireless network to an IP network via WiFi, Ethernet, 3G or 4G cellular. The LoRa wireless allows users to send data and reach extremely long ranges at low data-rates.It provides ultra-long range spread spectrum communication and high interference immunity.

LG01-P LoRa Internet of things Gateway 868-915-433MHZ
The HE module runs OpenWrt with the help of 64MB of RAM, and has 16MB flash, dual Ethernet controllers, and interfaces for USB host, UART, and 14x GPIOs. The module appears to come with a PA02 WiFi antenna, as shown in the images farther above.

Arduino Yun clone runs OpenWrt, offers Grove I/O
OLG01-N Single Channel LoRa IoT Gateway Click to open image! OLG01-N is an open source single channel LoRa Gateway. It lets you bridge LoRa wireless network to an IP network via WiFi, Ethernet, Or 3G/4G cellular via optional LTE module.
